DIANE ROSEN INTERIORS, LLC

With 20 plus years of experience, Diane Rosen of **Diane Rosen Interiors** brings her clients expert ways to create beautiful, yet energy efficient and environmentally friendly spaces. Recycle, reuse, reclaim, sustainability – these are everyday words in her design vocabulary. Rosen's philosophy is all about *Greening Your Home Interior*. An award winning designer, she is often asked to speak on subjects like *Home Sweet Eco Home*.

Everything old seems new again. Rosen shared a surprising tip on the newest decorating trend – wallpaper! “Yes, it's back, but with a new creative textured twist. You can still get your basic stripes, small and large patterns and prints. But if you want more pizzazz, bling or faux textured artisan walls, check out Romo's Omexico series. From soft rubbed faux to replicating stone textures on your wall(s), it's the perfect accent for that extra wow factor. These papers are fun, eclectic and add that wow factor in the most cost effective way.”
